

Bringing people  
together when it  
matters most

Funerals give family and friends the opportunity to connect with one another and celebrate the special people in their lives who have passed.

OneRoom Streaming enables people to view a funeral service using the internet, either live or later, at convenient times and across different time zones.

## What is OneRoom?

OneRoom is a system that records and also streams funeral services live, allowing people to view funeral services remotely – giving friends and family the opportunity for a private farewell at any time and any place.

The technology is purpose-built for funerals and provides a simple, reliable and high-quality digital platform for family and friends to connect to the service using a Mac, PC, smartphone, iPad/tablet or IP-enabled TV.

## How do I request to use OneRoom?

Request the service from your funeral director or celebrant.

## How does OneRoom work?

A funeral service can be viewed live or at any time following the service, either directly from the email invitation or from the One Room website, using a private access code:

---

The funeral director schedules the webcast with One Room

---

The family organiser receives an email invitation to the service

---

The organiser forwards the invitation to others or passes on the log in details

---

With one click inside the email, the service can be viewed

---

The service can be downloaded by visiting the One Room website

---

Viewers can also download iOS and Android apps direct from the email

---
